Sankar Group – Intern Assignment

Build an AI Voice Sales Bot

Deadline: 48 Hours

Objective

Create a working AI voice bot that can sell any SaaS product through an interactive voice conversation.

Requirements

1. **Voice Conversation:** The bot must speak with customers, understand their responses, answer questions, explain the product, and try to convert them into customers.
2. **Language:** Use any language, such as English, Hindi, or Telugu.
3. **Live Chat Screen:** Display the AI bot's messages and the customer's responses as text in real time.
4. **Call Controls:** Provide Start Call and End Call buttons, along with call duration and status.
5. **Call Recording:** After the conversation ends, save the voice recording and provide an option to play it back, with appropriate recording consent.
6. **AI Summary:** Automatically generate a short summary of the conversation, customer requirements, objections, and next steps.
7. **Sales Status:** Automatically assign one of these statuses:
    - Converted
    - Interested
    - Follow-up Required
    - Not Interested
    - Demo Requested
    - No Response
8. **Call History:** Display previous conversations with their recordings, summaries, transcripts, and final statuses.

Submission

- Working website link.
- Brief explanation of how it works in video

Deadline and Evaluation

- Complete the assignment within **48 hours** of receiving it.
- You may use any suitable tools, AI platforms, no-code tools, or programming languages.
- Focus on functionality and user experience rather than complex development.
- A static design or prerecorded conversation alone will not be accepted.

Final Goal: Demonstrate an AI sales bot that can conduct a real voice conversation, display live chat, record the call, generate an AI summary, and show the final sales status.

Build a simple, working solution within 48 hours.
